

Fetal Medicine & Genetics Centre

Fellowship in Fetal Medicine – 1 Year Program

Advance Your Expertise. Shape the Future of Prenatal Care

The **1-Year Fellowship in Fetal Medicine** at the **Fetal Medicine and Genetics Centre (FMGC), Gurgaon**, offers an exceptional opportunity for medical professionals to gain advanced training in the field of prenatal diagnostics and fetal care. Spearheaded by **Dr. Shreyasi Sharma**, a renowned fetal medicine expert with extensive international training and clinical experience, this program blends academic rigor with real-world clinical exposure in one of India's most respected private fetal medicine centres. This program is a comprehensive hands-on training program designed for medical professionals seeking to specialize in the diagnosis, monitoring, and management of fetal conditions.

Program Overview This full-time fellowship offers in-depth exposure to the full spectrum of fetal medicine, including:

- **High-resolution fetal ultrasound**
 - First trimester scan
 - Anomaly scan
 - Fetal echocardiography
 - Neurosonography
 - Doppler studies
- **Fetal interventions and therapy**
- **Genetics and genetic counselling**
- **Multidisciplinary care planning and genetic counselling**

What Sets FMGC Apart

- Mentorship by Dr. Shreyasi Sharma, an internationally renowned fetal medicine expert known for her patient-centred approach and precision diagnostics
- Advanced imaging infrastructure with high-resolution equipment and 3D/4D ultrasound
- Dedicated genetic counselling services—bridging fetal diagnosis with next-gen genetics
- High case volume and diversity, offering extensive hands-on exposure to rare and complex fetal conditions
- Personalized training environment with a focus on skill-building and clinical decision-making
- Gives you the perfect blend of clinical depth, technical skill, and genetic insight
- Active participation in clinical research, publications, and national conferences
